

Shape the future with us – and join our team!

As a [mover], discover what drives the industry and how we create competitive advantages together with our customers. As a [shaper], you will continuously develop our software solutions in the areas of core insurance, regulatory reporting or asset management and implement them for our customers in the best possible way.

Are you also a [mover & shaper]? If so, we are looking for you as a permanent ...

Part time (Senior) C# .NET Backend Software Developer/Engineer (m/f/d)

What to expect as a [mover & shaper]?

You will support...

- the migration of a successful software into a new service-based/cloud native architecture
- the combination of individual services into a complete system
- the development of new software solutions and be responsible for analysis, conception and further development ranging from design to delivery

What qualifies you as a [mover & shaper]?

- Completed studies in (business) computer science, mathematics, or natural sciences
- Several years of experience in software development
- You are confident in using C#/.NET Core in Visual Studio and are experienced in the backend development of service-based applications
- Solid German and English language skills

Mobile and flexible working is a matter of course for us. You won't have to move to work for us. Your Office will be the one that is located nearest to you (Berlin, Frankfurt/Main, Hamburg, Cologne, Leipzig or Munich). In working projects, you will support our customers nationwide on site. Are you a [mover & shaper]?
