

Internship Data science Indirect Taxes (w/m/d)

Tax & Legal

**Jobcode:
T-8703**

Deine Aufgaben

- **Software project** - Together with a senior data scientist you work on a project to automate processes in indirect tax from conceptualization to implementation. Tasks include scrapping and organizing data and applying machine learning algorithms for prediction and classification.
- **Data analysis** - You assist team members in data analyses and data visualization for client projects such as outlier detection in financial transaction or visualization of indirect taxes.
- **Legal tech** - You gain insight into the legal tech market by working with our tools and monitoring the latest developments in the tax technology market.
- **Network** - You work in a young heterogeneous team, eager to shape the indirect tax technology market.

Dein Profil

- You are proficient scripting R or Python.
- You have some experience with web technologies (javascript, HTML, css)
- You have gained some experience with machine learning algorithms
- You are confident with SQL and relational databases
- You have a growth mindset and are eager to learn new skills
- Tax or financial accounting knowledge is a plus
- German language skills are not required but a plus
