

NERA Internship (m/f/d): Competition Economics Berlin

NERA Economic Consulting is a global firm of experts dedicated to applying economics, finance and quantitative principles to complex business and legal challenges. For over half a century, NERA's economists have been creating strategies, studies, reports, expert testimony and policy recommendations for regulatory authorities, governments and the world's leading law firms and corporations. We bring academic rigour, objectivity, and real-world industry experience to bear on issues arising from competition, regulation, public policy, strategy, finance, and litigation.

About the Competition Economics Practice

The work of NERA's European Competition Practice consists of theoretical and empirical economic analysis to assist law firms and their clients in context of investigations by competition authorities of alleged competition law infringements, possible damage claims arising from the infringement, and the regulatory review of mergers and acquisitions. As a member of a young and growing team, you will support us on high-profile cases, especially in the German market. In a collaborative and rewarding environment, you will for example determine the extent to which the economic evidence is consistent with an infringement allegation, quantify the damage caused by a cartel, and advise the merging parties throughout the merger review process.

Your responsibilities include but are not limited to:

- Conducting literature and data research
- Conceptual analysis applying the theoretical literature to the facts of a case
- Management and cleaning of data
- Data analysis and interpretation of results
- Active participation in drafting reports, memoranda, presentations and other work products
- Support senior staff in generating intellectual Capital

Qualifications

- Bachelor, Master or PhD graduates in economics/econometrics, statistics or a closely related field with excellent academic records
- Excellent German and English oral and written communication skills
- Ability and willingness to work under tight deadlines and enjoy solving analytical and empirical problems
- Familiarity with office applications and statistical or mathematical software
- As a plus,
- Specialisation in microeconomics, industrial organization, econometrics and/or competition economics
- Fluency in other European languages
