

## Research Officer / Economic Analyst (m/f/d): Energy, Environment, Communications & Infrastructure – Berlin

NERA Economic Consulting ([www.nera.com](http://www.nera.com)) is a global firm of experts dedicated to applying economic, finance, and quantitative principles to complex business and legal challenges. For half a century, NERA's economists have been creating strategies, studies, reports, expert testimony, and policy recommendations for government authorities and the world's leading law firms and corporations. We bring academic rigor, objectivity, and real-world industry experience to bear on issues arising from competition, regulation, public policy, strategy, finance, and litigation. NERA's clients value our ability to apply and communicate state-of-the-art approaches clearly and convincingly, our commitment to deliver unbiased findings, and our reputation for quality and independence. Our clients rely on the integrity and skills of our unparalleled team of economists and other experts backed by the resources and reliability of one of the world's largest economic consultancies. With its main office in New York City, NERA serves clients from more than 25 offices across North America, Europe, and Asia Pacific.

Our mandates include the design of conveying systems for renewable energy, the development of economically efficient pricing systems for transport infrastructure, the investigation of efficient financing costs as well as structures for infrastructure investments and the creation and critical assessment of economic expert reports in lawsuits and arbitration procedures.

### We offer

For our expanding office in Berlin, we are looking for a dedicated team and offer interesting, versatile and challenging tasks and insights into the day to day business of an economic consulting firm. We offer a full time position and competitive remuneration as Research Officer or Economic Analyst, depending on previous experience. Economic Consulting lies at the exciting interface between scientific work, economic expertise and customer-oriented consulting. Our new, growing office in Berlin benefits from the company's global resources, its close collaboration, in particular, with offices in Frankfurt, London, Paris, and Madrid as well as opportunities for cooperation with Oliver Wyman.

You can expect an enjoyable working environment, a dynamic team, flat hierarchies as well as great perspectives for professional development. We usually work in small teams so that you can take on responsibility for your own career with the help of your colleagues. We put emphasis on a good work life balance through, amongst others, part time employment schemes. Usually, we work from the office in Berlin with occasional business trips due to client meetings. In the context of the ongoing pandemic, remote work is possible. From day one, you will be supported by a personal mentor and an extensive training curriculum.

### Responsibilities

- Active co-creation of studies, appraisals and presentations, from the conception to the execution of economic analyses up to the documentation of results
- Research and analysis of company, industry and market data, using, among others, statistical tools
- Quantitative research applying your economic knowledge gained in university
- Close collaboration with colleagues and clients as well as clear communication of complex economic issues, including actively participating in team and client meetings

### Your profile

- Very good university degree (Master, PhD) in economics, finance or a similar discipline
- Interest in economic topics, especially of microeconomic nature. Energy economic knowledge is helpful but not required
- Intellectual curiosity, critical thinking, precise and solution-oriented way of working as well as the ability to quickly become acquainted with unknown issues
- Enjoying analytical and quantitative work
- Excellent written and oral communication skills in German and English, other languages are of advantage
- High degree of reliability, sense of responsibility, ability to work in a team and motivation
- First experience in applied economic research is desirable (but not compulsory), e.g. through internships or first work experience with international organizations, economic research institutes, consulting firms or banks

### Interested?
