

# Show us how FRITZ! you are when you join us as an **App Developer for Android/Kotlin and Java**

At AVM, we believe that technology is making the world a better place: millions of people are finding their way online or transforming their house into a smart home thanks to our market-leading products, chief amongst them our FRITZ!Box. How are we managing it? With ingenuity. Attention to detail. And a healthy dose of courage. And by doing everything ourselves, from designing the PCBs to developing the software. As well as making us proud, it's also a lot of fun. If you'd like to help shape the future of communication, you'll find 880 like-minded individuals on the banks of the Spree in the heart of Berlin.

---

## Do you live for programming apps?

- Developing FRITZ! and making it even better Apps and new features
- Managing and continuously fine-tuning existing FRITZ! apps throughout their lifecycle
- Devising unit tests and Android tests to ensure product quality
- Working closely with Product Management, the User Interface Design Team and Quality Assurance

## We're looking for someone like you:

- Good degree in computer science or media informatics from a university or university of applied sciences or, alternatively, experience of Android projects
  - Knowledge of Kotlin/Java
  - Initial experience of working with design patterns (e.g. MVVM, Repository, Gang of Four)
  - Good German skills (at least B2 level)
- 

## You can look forward to:

- A state-of-the-art smartphone, including for personal use, and AVM hardware for your development work as well as agile software development and continuous integration
- A forward-looking company with an informal and friendly corporate culture
- A working environment where everyone feels comfortable, where fun meets professionalism and creativity is combined with high quality standards
- Scope to make your own decisions and take responsibility in developing the technology of tomorrow
- Flexible working for a healthy work/life balance
- Structured onboarding process with company-wide networking events to get you off to the perfect start
- A wide range of opportunities for development and learning from and with one another at a high technological level, e.g. during our Developer Coffee Breaks
- Generous discounts on local public transport tickets – for the sake of the environment
